

Battlefield Tactics: **Act Quickly**

**Visible Powdery Mildew Infection:
Eradicate Immediately!**

Check known powdery mildew hot spots.
At first sight **eradicate immediately** with
HML32, copper and potassium bicarbonate.

HML32 works through contact, so maximum efficacy is achieved through good coverage.

Follow the advice on 'Latest News' on the website regarding formula and application.

Eradicate early, do it well, and with luck you will only need to do it once.

Farmlands stock potassium bicarbonate ultra milled for this purpose.

For HML32 spray programme details, talk to your Farmlands advisor. Or visit us online at:
www.henrymanufacturing.co.nz

Protector^{hml} and HML32: **armour plate for grapes**
